# 1 How to Read the Daily Schedule

## Assignment Schedule *Version 1.0*

*Note:* The following assignment schedule is subject to revision and is intended to be a general guide to the assignments this semester. The assignment written on the board at the beginning of each class takes precedence over this schedule. As the semester progresses, for the most recent version of our class schedule, check this URI (Internet address):

<http://philosophy.lander.edu/logic/assignment/>

If an update to the schedule is available, the version number will be a number higher than *Version 1.0*. (For example, the first revision, if there is one, will be labeled *Version 1.1*) In the “Date” column, the number after *M*, *W*, or *F* is the number sequence of the class, counting from the beginning of the semester. *M*, *W*, and *F* stand for “Monday,” “Wednesday,” and “Friday” respectively.

In the “Class Topic” column, the subjects covered in the class

period are listed, together with important assignments *due* on that day, including tests. The “Assignment” column lists the day an assignment is assigned, *not* the day the assignment is due. Items listed in the assignment column are due at the beginning of the next class meeting period unless stated otherwise.

The reading assignments refer to the URIs or the Internet addresses of online readings. You may also access the readings in by navigating to this URI and following the menus presented there:

<http://philosophy.lander.edu/logic/>

This URI is the Homepage for our logic course. The logic tutorials and other notes are made available by clicking the appropriate course topic in the column to the right entitled “Course Topics.”

Additional help is available with the example online tests, quizzes, and logic links, not listed below in this assignment sheet, but these are accessible from the Introduction to Logic Homepage also.
