

Phil. 103: Introduction to Logic
Quiz: Successive Immediate Inferences

Fall 2002 ©2002 OPL

Directions: Given the truth of "**All splitscreens are practicums**" what can be validly inferred about the truth or falsity of "**Some practicums are non-splitscreens**"? (Cite the proper logical relation and appropriate truth value for each successive inference. You may abbreviate by using "S" and "P" for "splitscreens" and "practicums.")

Statement or Proposition	Logical Relation	Truth Value
1. All splitscreens are practicums	given	true
